BRANCH OFFICE, METROPOLITAN BANK BUILDING, No. 110 BROADWAY, N. Y.

TWO MILLIONS, ONE HUNDRED THOUSAND. CAPITAL - ONE MILLION.

Last dividend paid in cast to all the policy holders, 39 \$\mathbb{P}\$ cent, amounting to over \$400,000, and making nearly \$1,000,000 thus paid since the company began business. The past year, 1861, notwithstanding the adversities of the times, was one of marked prosperity.

WILLARD PHILLIPS, Pres.

Economy, care in its risks, and prudent investments characterize this Company. The last report of the Insurance Commisers, comparing this company with all the principal companies, makes this the leading company in the United States, in surplus and economy.
This Compa

my being purely mutual, insures at the lowest possible rates; and, if the premiums paid exceed the actual cost,

This Company being purely mutual, insures at the lowest possible rates; and, if the premiums paid exceed the adual cost, the aurphus is returned to the parties insuring.

Every five years, at the time of declaring the dividends, the business is, as it were, closed, so that its a citual position and solvency are made manifest at that time; and the surplus funds are divided pro-rate, among all the insured. This issued against any possible loss from inefficiency on the part of the Company, and is a sure guaranty as regards the future. The terms of payment are poentialry advantageous to the insured. Premiums can be paid annually, semi-annually, quarterly, or one half of the first five annual premiums on life policies loaned to the insured, if desired.

Insurances may be effected for the benefit of married women, beyond the reach of their husband's creditors. Creditors may insure the lives of their debtors.

Documents of an interesting character, showing the benefits of the mutual plan, explaining the different forms of policies and the manner of making payments, furnished gratis, upon application, by mail or otherwise, to

JOHN HOPPER,

Agent and Attorne (Metropolitan Bank Building) 110 Broadway, New York City.

THE

SAFE-GUARD.

Trus work is at length thoroughly completed, being now arranged GEOGRAPHICALLY AND ALPHABETICALLY, thereby obviating the only objection there ever was to it. The notes of each Bank are all on one page, and it is but the matter of a moment to find any note required. This work has cost as many years of toil and expense, and we now present it to the public, with the assertion that no work was everynhished that is of greater millify for commercial purposes. It is of interest and importance to every individual, of every age, condition, or sac, who handles a dollar of the miscellaneous and precardous paper currency of our constry.

The paper money of the United States is of south infinite varieties of design and execution, that the artful and accomplished counterfeiter can

The paper money of the United States is of such infinite varieties of design and execution, that the artful and accomplished counterfeiter can sport upon and depth the perception of the great majority of our people. And the frequent and cruel impositions so repeatedly practised upon the honest and creditions, have derived their impunity from the fact that other works and Detecters have only attempted to direct attention to the spurious and counterfett, while, in our SAFE-CUARDA LOOK, has the lies been developed of minately describing the general magnetic and confederates, distribute and circulate their issens simultaneously in different and distant localities. These notes (not being described in the Reporters distributed and circulate their issens simultaneously in different and distant localities.

A new conneterfeit, or aparfous Bank note, is prepared by a rogue, who, with his numerous accomplices and confederates, distribute and circulate their issues simultaneously in different and distant localities. These notes (not being described in the Reporters and Detecters) being readily taken by the unsaspecting, and by the imperfect indges, in a short time obtain an extensive circulation; and days, weeks, and, in some instances, months have elapsed, before the virtua-YBank Note Reporters have informed the commantify that they have been fearfully victimized. Thus, being at last exposed, but not nutil be has respect a rich harvest from his first issue, the counterfeiter again takes the plate to his hanuit and alters it to some other bank or denomination, and may do the same thing again and again, and each time with impunity and profit, before the Detecters can act as an efficient sheek on his proceedings.

Herein is exemplified the great apperiority of the SAFE-GUALD over all Reporters and other, and have no resemblance to the general superiority of the SAFE-GUALD over all Reporters and other, and have no resemblance to the gennine. They are detected at a glance by reference to the SAFE-GUALD (not be being therein portrayed a perfect Daguerreotype of the genuine notes; the dress and design of which are as malific the spurious as in light to darkness.

They are intended to resemble and initiate the trae, and calculated to circulate where the genuine are well-through but can be more easily distorbed, by close impection, than any ounce close to be dolls. Very few of this description are in circulation. Nine-tentas of the bad bills in circulation being altered, raised, or spurious. On reference our Reporter this will be seen.

Within a few years, photograph imitations have made their appearance. They can be detected by applying cyanide of potassium, which turns the bills white.

turns the build white.

In a word, Turn SAPE-GUARD detects all rast, present, and futures spurious, altered, and raised notes, and is of more value, protection, and security to the commercial interests of the country, than all the Detectors, Bank Note Lists, and other works which, np to this time, have been published. In fact, the SAFEGUARD is almost indispensable, you for roots rate and DO, FART ANTICIPATES THE CONTEMPERTIES, cutting of his success, while the Reporters and Bank Note Lists but follow AFTER, and to use a homely but forcible expression, "can only lock the stable after the horse is stolen."

We have herein endeavored to show the ntility and importance of this work, and with the promise that it shall be always correct to the date of its issue, we are satisfied to send it forth to the public on its own merits.

Its issue, we are satushed to senon torus to the puone on its own menus.

27 On another page will be found commendations from all the first class Bark Notz Evenaving Companies in the Union, endorsing Horosz's AMERICAN RANK NOTE SAFE-GUARD. This testimony, together with the approval and patronage of nearly every Banker and Broker in America, at once stamps it as the most valuable publication of the times—indispensable to every well-regulated counting room or busness place.
